

**DIGITAL
CLOCK IN C#
WindowsForm
Application**

By DJVprogrammers

Code:

```
using System;
using System.Collections.Generic;
using System.ComponentModel;
using System.Data;
using System.Drawing;
using System.Linq;
using System.Text;
using System.Threading.Tasks;
using System.Windows.Forms;

namespace Digital_Clock
{
    public partial class Form1 : Form
    {
        public Form1()
        {
            InitializeComponent();
        }

        private void label1_Click(object sender, EventArgs e)
        {
        }

        private void timer_tick(object sender, EventArgs e)
        {
            //this is the main part to pick the time...in hours, minutes and seconds..
            //we need a label and a time picker tool for this..
            // I have extended my program and added events for each month...

            label1.Text = DateTime.Now.ToString("HH:mm:ss");
        }

        private void Form1_Load(object sender, EventArgs e)
        {
        }

        private void click_event(object sender, EventArgs e)
        {
            string dm;
            Button eventt = (Button)sender;
            if(eventt.Text=="EVENTS")
            {
                //pick the current month...
                // and set events for it.. like this
                dm=DateTime.Today.ToString("MM");
                if (dm == "01")
                    textBox1.Text = "Saad's Birthday(08 Jan)\nMama's Birthday(19
Jan)\nAmna's Birthday(30 Jan)";
